

Sean Welsh Brown

Full-Stack Web Developer / Software Engineer

Brooklyn, NY 11201 | seanwelshbrown@gmail.com

Portfolio: www.seanwelshbrown.com | Social: [Github](#) / [LinkedIn](#) / [Dev](#) / [Medium](#)

SUMMARY

Highly motivated Developer and Software Engineer with an ability to quickly parse, learn, and implement new technical information. **Skilled in public speaking, problem solving, collaboration, communication, and meeting and exceeding project deadlines.**

TECHNICAL SKILLS

JavaScript (ES2016), React, Redux, Gatsby JS, Ruby, Ruby on Rails, HTML, CSS, SQL, PostgreSQL

PROJECTS

Focus - hosted: <https://focus-timer.app/> | *GitHub*: [Front End](#) / [Back End](#)

A Meditation and Focus wellness app, prioritizing minimalism and productivity.

- Built front end using **React**, **Redux** and **custom CSS**; prioritized clean, DRY code and comments.
- Developed a **Rails API** back end with routes for authenticated Users and saved Meditation/Focus sessions.
- Utilized Moment.js and **external APIs** for a dynamic, informational home page.

The Fractal Zone - hosted: <https://thefractal.zone/> | *GitHub*: [Front End](#) / [Back End](#)

An interactive graphical application to generate and save custom geometric fractal designs.

- Built front end using **React** and **custom CSS**.
- Developed a **Rails API** back end for persistence of authenticated Users and saved Fractal designs
- Utilized **P5.js** to create a responsive HTML5 canvas to render designs.

Today - hosted: <https://liaowow.github.io/today-frontend/> | *GitHub*: [Front End/Back End](#)

A personal journaling app to archive daily moods and thoughts.

- Built front end in **vanilla JavaScript**, using only native features to strengthen fundamentals.
- Utilized **Bootstrap** framework for styling.
- Developed a **Rails API** back end to persist user entries and moods, and do additional logic to render mood trends.
